Experience

Oilpath Hydraulics
General Manager
February 2012 - Present

Adelaide, Australia

Oilpath Hydraulics Pty Ltd

General Manager (June 2014 – present)

Operations Manager (February 2012 – May 2014)

www.oilpath.com.au

Oilpath are Australia's only remaining local designer and manufacturer of Directional Control Valves, offering valves that can be manually, pneumatically, electric over pneumatic and hydraulically/electronically actuated

Being a local manufacturer we can also offer a unique range of spool options such as Single, Double, Motor and other types of spool which can have a range of positioning options such as 3 way detent, Spring Centre to “A” or “B” with detent

Oilpath is also a key player in the design and manufacture of systems that include integrated hydraulic control manifolds utilising HydraForce cartridge valves to provide industry leading solutions

Our highly experienced team of Design Engineers offer a full system solution service from original circuit design through to the manufacture, assembly and testing of one off prototypes and follow on production quantities

Being a full service provider places Oilpath in the unique position of being able to function test all manifolds at flows and pressures specified by the customer before despatch

If your project requires development of hydraulic valving solutions prior to volume production Oilpath has a long history of involvement in working with manufacturers to take ‘concept to Commercialisation’

Our dedicated staff can liaise with your engineers and designers to work through the many issues that arise during the prototyping phase of new product introduction

With this background, proven track record and design resources at hand, Oilpath will work with you to bring your concept or complex hydraulic valving project to fruition

Airborne Systems Ltd
Customer Business Manager
September 2009 - October 2011 (2 years 2 months)
Llangeinor Bridgend UK

AIRBORNE SYSTEMS (Sept 2009-Nov 2011)
Customer Business Manager UK & International

Key customers: BAE Systems, Cobham Aviation, Martin Baker Aircraft, Eurofighter

www.airborne-sys.com

Airborne Systems is the world's most trusted resource for parachute design and manufacturing. We have a foundation of nearly 100 years of designing, developing, and fabricating parachutes. With the expertise of highly skilled engineers, craftsmen, and aerospace and defence professionals, we have gone beyond our company's original founding principle of landing aviators safely, to using advanced technology to develop a diverse range of products for all kinds of applications and missions. Our company creates and manufactures best-in-class parachutes for the military; GPS precision guided cargo delivery systems; low cost cargo delivery parachutes; parachute releases; personnel and cargo systems; rescue and survival equipment; space and air vehicle recovery systems; and deceleration systems for high-performance aircraft
